STATINTL

STATINTL

Dear Bob:

We understand that you are currently holding four or five configuration "dog houses". As you know, we will be supplying at least one configuration for the new program and we hope several.

If it is at all possible to use the present units for shipping and handling containers, even though slight modification for supports may be required, it will aid us in keeping costs at a minimum.

Would you please hold the dog houses until we have had the opportunity to ascertain their usability. It would be very helpful if we could obtain a drawing of the unit showing major dimensions of the enclosure.

Yours very truly,

STATINTL
